Everest’s Upright Top Mounted Reach-In series offers an outstanding combination of refrigerator, freezer and dual temperature options as well as full or half door and drawer variations for multiple applications. The line is geared for sustainability and energy efficiency with features designed to reduce compressor run time and the reliance on electricity.

**Digital Control**
- Multi-function with easy to read LED display.

**Field Reversible Doors**
- Detachable for on the spot field reversal.

**Pre-Installed Door Locks**
- Provides security options for any situation.

**Recessed Door Handle**
- Heavy duty with high traction surface.

**Heavy Duty Swivel Casters**
- Standard 5" with locks on front set.
- Optional 3" swivel caster or height-adjustable leg replacements also available.

**Leg Stabilizers**
- Adjustable stainless steel clad ABS leg provides extra stability when opening doors.

**Full Length Air Duct**
- Ensures optimal distribution of cold air.

**Shatter-Proof LED Lighting**
- Silicone coated and energy efficient. Provides bright, high color illumination with low heat output.

**Air Circulation Guard**
- Guarantees unrestricted airflow in cabinet interior.

**Vacuum Relief Valve**
- Automatically equalizes cabinet pressure for smooth access to cabinet interior when re-opening doors.

**Ridge-Lined Door Gaskets**
- Keeps air tight seal and promotes smooth cabinet re-entry. Snap-in for easy cleaning and replacement.

**Stainless Steel Interior & Exterior**
- High quality with rounded corners for a hazard-free workspace.

**Air Tight Seal**
- Self-closing door with adjustable torsion system ensures a positive seal.

**Thick Insulation**
- 2.5” thick high density polyurethane insulation ensures temperature stability and conserves energy.

**Self-Maintaining Condensate Pan**
- Energy efficient and requires no external drains or electric heaters.

**ECM Evaporator Fan Motor**
- Electronically Commutated. Achieves rapid cooling with less energy.

**ECM Condenser Fan Motor**
- Reversible and Electronically Commutated. Cools down compressor and supports condenser coil cleaning.

**Blizzard R290 Condensing Unit**
- Top mounted, self-contained, fully detachable and uses environmentally friendly, EPA-compliant R290 refrigerant with zero (0) Ozone Depletion Potential (ODP) and three (3) Global Warming Potential (GWP).
- Blizzard R290 is easily replaceable and requires no on-site brazing.

**Audible Overheat Protection Alarm**
- Keeps compressor and condenser coil from overheating.

Standard Features & Benefits

**Vacuum Relief Mechanisms**

Difficulties in opening refrigerator and freezer doors often occur when the cooler cabinet interior is exposed to warmer ambient room temperature during entry. Warm air contracts as it mixes with cold air creating a powerful vacuum effect. Everest units are equipped with patented vacuum relief mechanisms to alleviate pressure and promote smooth door entry.

**Caster & Leg Height Variation**

Some spaces have very specific height requirements for refrigerators and freezers. Sometimes an inch or two is all that’s needed to fit equipment under a counter, or in a low-ceilinged room. Everest products come with front-locking 5” swivel casters. To meet height specifications, Everest also offers 3” locking casters and interchangeable legs that adjust from 3.5” to 6” tall. These options are available at no additional charge for models that come standard with casters.

**Field Reversible Doors**

Smaller kitchens depend on creative, space-saving techniques and well planned installations. Sometimes, the solution is as simple as a door swing orientation. Most Everest products come with doors that can be reversed in the field with just a few simple steps.
