Blizzard R290 Slide-Out Cooling Cartridge

Engineered for Safety and Ease

No Onsite Brazing

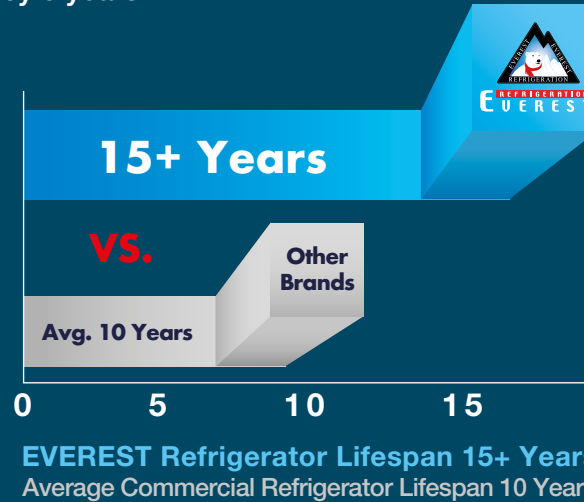

Refrigeration repair often requires brazing. Everest eliminates this by sending a new Blizzard R290 replacement for Everest products that meet qualifications. No hassle and 100% safe.

Brazing Dramatization

Longer Product Lifespan

Blizzard R290 is the central hub of an Everest product. Replacement of the cooling cartridge means a virtually new machine beating out other competitors in product life expectancy by 5 years.

Shorter Downtime

No guesswork on leak detection and repairs mean faster service completion so you're back to business in no time.

Auto-Diagnostic System

Audio and visual alarms cue users to high ambient temperatures. Improves product performance and longevity.

Maintenance Free

Dual rotation, auto-reverse fan keeps the compressor cool and helps keep the condenser coil clean.

Environmentally Sustainable

Blizzard R290 uses natural R290 hydrocarbon refrigerant with zero Ozone Depletion Potential (ODP) and low Global Warming Potential (GWP). R290 is fast cooling, which means less energy wasted. Approved by EPA and DOE.
